

Respectfully, as you are aware, mechanization has been one of the serious and sensitive issues for our country health sector during the recent years, which has unfortunately resulted in disordering health centers and eventually changing software systems by the relevant managers due to failure to establish fair relation with customers by the company offering products and services, insufficient knowledge of esteemed customers on the current needs and futuristic overview, in terms of both using and technic, and investigating the method of rendering engineering services by the relevant companies, which in turn has resulted in huge expenses and wastes of capital in this field.

Therefore, considering the fact that the decision to make such process was made simultaneously with development of Medical Informatic new generations, which shall meet the needs of successful and effective managers to a significant extent, both in terms of practicability and technically, it would be appreciated if again a new and sensitive view is applied in this regard based on your previous brilliant background.

**Tarah Dadeh Pishro Company**, with more than **thirteen years** of experience in the field of designing and implementing integrate hospital data systems (**TEB PARDAZ**) has decided to launch its unique offer on installing, running and maintaining your center software. This company takes benefit from state-of-the-art technologies and software designing and developing tools to become the implementer of the best and most modern integrated software systems for health centers.

Therefore, please provide our company with a short opportunity to introduce our new software as a means to assist you in applying modern managerial policies. Some of our company software systems features are introduced as per the following:

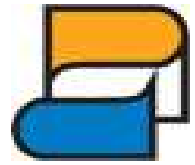

1. A variety of managerial reports;
2. Presenting comprehensive and integrated **health, financial and administrative systems** all patented by **Tarah Dadeh Pishro Company**;
3. Applying all calculation formulas for discharging, paraclinics, clinics and emergency wards in terms of your organization requirements;
4. Implementing **final cost price tool** of each unit in compliance to health centers' needs;
5. Separating income of all hospital wards and units;
6. Connecting all wards with paraclinical units and vice-versa;
7. Connectivity to all medical devices and equipment;

8. Offering a tool to digitizing prescription and patients history using PC. Tablet, optic pen, and template forms;
9. **Automatic generation of all accounting documents** without any need for manpower;
10. Fully paperless connecting units with cash fund and discharging unit of hospital;
11. Changing discharging unit into a **fully controlled** unit and not a unit for entering details and real time and online invoicing;
12. Connecting hardware devices of laboratory, OP, imaging devices as well as all medical devices and equipment with software-related output;
13. Total web-based reporting considering security protocol;
14. Round-the-clock SMS informing the physicians, including:
  - Physicians invoice balance;
  - Notifying admitted and discharged patients under physicians service;
  - Notifying nursing advisory and visit requests;
  - Notifying amounts remitted into physicians account by the hospital;
  - Sending any type of SMS upon client request.
15. Supporting patients holding **double and single (basic) insurance coverage** and all standard outputs acceptable for insurers both in printout and file formats;
16. Generating CDs on latest clinical data of patient during her/his term of treatment, such as:
  - All test results;
  - All imaging center responses;
  - Detailed list of all consumed medications and medical equipment;
  - All measures taken in OP based on relative values and all hospital wards.
17. **Patient electronic cuffs.**

**Advantages provided for your center:**

1. Customizing software considering managers and users requests;
2. Developing research and specialized forms and extracting various reports through software localizing phase;
3. 12-month software guaranty;
4. Converting all data available from previous software as much as possible;

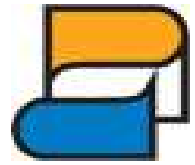

5. Linking with all systems and software, inter alia, queue system, PAX system, etc.

**Company History:**

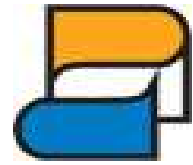

Some of the most important clients of the company have been introduced in the following table, all customized and now active considering their needs and working procedures. On the other hand, they are frequently subject to company visit and need surveys and all requests are made company site and given to the users by taking benefit from different methods.

At the end, we would appreciate if you could provide us with your managerial viewpoints as a means to expedite the measures relating to project fulfillment and implementing of the offered mechanization system.

### Company Products:

1. Emergency management system (outpatients- under supervision)
2. Fund management system
3. Inpatient admission management system
4. Inpatient discharge system
5. Physicians accounting system
6. Contracts management system (outpatient and inpatient)
7. Accounting, health and financial document issuance system (H-M-I-S)
8. Laboratory management system
9. Radiology centers management system
10. Physiotherapy management system
11. OP management system (secretary and warehouse)
12. Inpatient and outpatient pharmacy management system
13. Wards management system
14. Hospital information system
15. Health center management system
16. Medical equipment management system (PM)
17. Hospital food and kitchen management
18. Accounting system
19. Salary, compensation and staff
20. Treasury system
21. Warehouse system
22. Secretariat
23. Furniture and fixture system
24. SMS system
25. Security control system
26. Administrative automation system
27. Managerial dashboard system
28. Medical documents system

### Company products technical specifications:

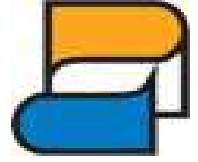

1. Implemented using Net technology, Framework 2.0 SP1, 2016 edition
2. Sql Server 2014 Database
3. Designer and developing reports by Crystal Report XI Release 2
4. Encoded using SPECTR-H64
5. With user interfaces in Windows Application format and Web-based managerial reports
6. Producing all systems using Object Oriented Programming (OOP)
7. Current tested number of clients for this system is 400 clients with 160 simultaneous users
8. The foregoing systems have fully been designed and organized using rational unified process engineering method
9. Implemented using 3-tier layer architecture in compliance to the latest software development standards
10. Using TCP/IP protocol as the company main chosen protocol

### Hardware Specifications

Hardware is categorized into two parts: hardware required for the Server and clients. In the following the needed hardware specifications for each of these parts are focused.

#### Required Specifications for Server:

Server Model:	HP ProLiant ML350 Gen 9
Server Specifications	
Server Processor	2 X Intel® Xeon® E5-2699v3 (2.3Hz/10-core/25M/105w)processor Kit
System Memory	HP 64 GB DDR3-1333 Registred DIMM Memory
HDD Model 1	8 X Dual Rank x4 DDR4 Load Reduced Memory Kit
storage	HP2x1.2 TB 6G SAS 10K rpm SFF(2.5-inch) SC Dual Port Enterprise

Main Raid Controller	HP Smart Array P420i/Zero Memory Controller
Optical Drive	HP 9.5mm SATA DVD RW Jb Kit
Main Raid Controller	HP Smart Array P440i/Zero Memory Controller
BBWC/FBWC	HP 1GB P-series Smart Array Flash Backed Write Cache
Embedded LAN Card	FlexibleLOM Network Ports (HP Ethernet 1Gb 4-port 331FLR Adapter )
Graphics	Integrated Matrox G200 video standard
Expansion Slots	1 full length PCIe v3.0 x16 slot , 1 Half Length, Full Height PCIe v3.0 x8 and 1 Half Length, Full Height PCIe v2.0 x4 Slot
